(54) Title: LOOSE COFFEE APPARATUS, SYSTEM AND METHOD

(57) Abstract: An infusion container (30) for use with a brewer (20). The infusion container (30) includes a body portion defining at least a portion of a cavity therein. At least a portion of the body being liquid permeable. The infusion container liquid permeable portion facilitates brewing a beverage by allowing water to pass through the infusion container. The infusion container may be an individual structure which can be placed in and removed from the holder (30). Additional components or group of components for use with the beverage holder (30). The infusion container provides structures and methods facilitating convenient use of a brewer which allows the user to use the type of substance and quantity of substance of their choice and efficiently clean the substance holder (30).
